>> It will be tough down there. >> A lot of rain. A lot of rain on the southeast bahamas. About 2-4 inches of rain to bermuda but going west of bermuda. Wind won't be a big issue. That will head out to sea and basically a storm from here on out: there you see the winds 75 miles per hour. We're waiting for an update from the hurricane center at 5:00 a.m. It's not looking all that impressive on the satellite imagery as you can see. Perhaps we'll see if this can maintain its strength. Here's the track from the hurricane center. You can see it is going west from bermuda. Bermuda is going west as a category one hurricane and going close to 0 miles off our shoreline. This won't be a big impact for any land areas but it will kick up the surf and make for big waves. Rough surf for increased rip current risk starting really tomorrow through the end of the week. So keep that in mind if you have beach plans. The rip current risk is is low today. Lots of sunshine. The U.V. index is still high. We have a high tide coming up smack dab in the middle of the day right around 12:30 this afternoon. A great beach day today. If you can't go, if you're getting ready to head out the door these are the temperatures you're stepping out into. Boston 66. Lawrence 63. Some 50's still in the suburbs. Plymouth 58. We have 50s on the cape as well. A little bit of patchy fog in some of our low-lying valleys. This will be burning off after sunrise. It's pretty ice layed. Above it skies are mainly clear up and down the eastern seaboard. Very quiet today. The action is in the nation's mid section associated with this frontal boundary. Out ahead of this front, warm, humid air is is kind of pooling. Dew point temperatures are running in the 60's to around 70 degrees. That's the current dew point downtown. Humidity will continue to feed in on with southwesterly winds. Dew points already close to 60 degrees. They'll come up into the mid 60's by tomorrow. So a little bit stickier for your wednesday. Then we'll turn less humid through the rest of the week. A mostly sunny one today. Near 80 at the coast. Slight winds. 85-90 degrees inland. A couple of towns today may lunge toward the 90-degree mark, nashua and metro west. 87 taunton. Boston may sneak to 84 before a sea breeze does kick in for a time this afternoon. Right along the coastline including the cape should be pretty close to 80 degrees. We'll watch the frontal boundary press toward us as we head into wednesday helping to steer cristobal out on to sea. As that front approaches tomorrow, west-southwesterly winds kicking up
a notch should keep the sea breeze away. We'll be very close to 90 degrees in boston tomorrow. We should get there in many of the suburbs north and west of town. So tomorrow is likely the hottest day of the week. With that front approaches, it can't rule out a spot thunderstorm. But there's moisture lacking in the atmosphere. As that front approaches, it will have the potential to kick up a shower or thunderstorm but it doesn't look like anything widespread. I think the best chance will be late in the afternoon toward evening and especially along and south of the mass pike. So we'll watch that threat wednesday into thursday. We head toward the upcoming holiday weekend. Saturday looks like the best day. It turns humid on sunday. Right now it looks as though we'll keep that humidity around for labor day on can't rule out a shower or a thunderstorm. So the best bet if you have outdoor plans this holiday weekend looking like saturday. Out the roads, back to work and even school for some of us. >> I can't believe it's already that time. A live outside for you. 93 through the somerville stretch looking good in both directions. No problems to report. Here's what's happening across the rest of the area. Final stages of construction. 93 south as you travel from roosevelt circle down to the leverett connector and then again approaching that o'neill tunnel. More roadwork in place a little farther south. By furnace brook and also 128 northbound by route 1. Construction eastbound on the pike by 128. North of town you're in good shape. The trains and buses expected to start the morning on time. >> Thanks. As you head out the door this morning you'll probably either find this offensive or entirely accurate. Allstate just named worcester drivers the worst in the country! And boston taking the second worst spot. The company looked at collision data and found that boston drivers crash about every four years. The best drivers are in fort collins, colorado. >> With just two weeks left until the primary. Martha coakley's double-digit lead over her two democrat opponents for governor has shrunk. A new suffolk university/boston herald poll of likely primary voters has the attorney general leading steve grossman by 12 points. Donald berwick is trailing with 16 percent. On the republican side, charlie baker appears to be sailing to his party's nomination. He leads mark fisher by almost 60 points. This was a poll of 400 likely voters. State Treasurer Steven Grossman is cutting into Attorney General Martha Coakley's lead in the Democratic race for Massachusetts governor, according to a poll.

Coakley's lead, once as high as 40 points, was 42% to 30%, in a Suffolk University-Boston Herald poll of 400 "very likely" primary voters released Aug. 25. Former Obamacare administrator Donald Berwick has 16% of the Democratic primary vote.
Mass. Poll Shows Democrat Coakley Up by 12, Republican Baker by 60
Targeted News Service | 08/25/2014

Suffolk University issued the following news release:

Attorney General Martha Coakley (42 percent) leads her closest rival, Treasurer Steven Grossman (30 percent) by 12 points, according to a Suffolk University/Boston Herald statewide poll of tightly screened likely Democratic primary voters. Donald Berwick received 16 percent, and 12 percent were undecided.

"Martha Coakley is leading Steve Grossman, but Don Berwick's share of likely voters continues to grow, and there is a pool of u
